Scientific-technical and economic report - Educational Innovation Projects - Euskampus Missions 1.0 2021 Programme

### $\rightarrow$ Title of the Educational Innovation project

.....

 $\rightarrow$  **Principal Investigator's details (PI) 1** (contact details)

→ **Details of PI 1 research institution** (contact details)

In the case of co-leadership with two principal investigators

→ Principal Investigator's details (PI) 2 (contact details)

→ **Details of PI 2 research institution** (contact details)

### **Overview of the Educational Innovation Project**

- Acronym
- Key words
- Thematic field
- Challenge addressed by the project
- Abstract (maximum 100 words)

#### Area(s) involved in the project:

- Experimental sciences
- Engineering and Architecture; Health Sciences
- Social and legal sciences
- Arts and Humanities

# Scientific discipline(s):

# Thematic field:

- Resilient Societies
  - o Psychological and sociological impact
  - o Building resilient regional and local ecosystems
  - o Conflict and crisis management
  - o Rethinking work environment and business models
  - o Ethical implications and protection of individual rights and liberties
  - o Towards a circular economy
  - o GOB-TECH: government and administration assisted by technology
  - o Other

# • Oceans and waters

- o Health and sustainable valorisation of the oceans
- o (Renewable) energies in the marine environment
- o Marine biotechnology
- o Pollution, ecosystems and coasts
- o Blue skills and employability
- o Climate change adaptation and opportunities

	0	Ecological Footprint: Heritage, Impact and Legacy
	0	Blue Economy/Circular Economy (extraction, manufacturing, production and
		consumption)
	0	Sustainable maritime transport Other
Other:	0	other
$\rightarrow$ Ped	agogica	l proposal (maximum 2.000 words)
•		t/Background
•		ation of the proposed educational innovation plan: Objectives and milestones; Methodology; Timeline
	•	of the project on the learning experience
•		fication of ethical issues: In the case of Projects including research activity,
•		nents, and interventions, these will require a prior mandatory favourable report from the
	•	Committee or equivalent body of the proposing institutions before starting the Projects
		more, it shall be subject to the current regulations on everything related to:
٠	Use and	d processing of personal data
•	Researc	h and interventions on humans and/or use of human biological samples
٠	Use of a	animals for experimental or other scientific purposes
•	Researc	h using genetically modified organisms
•	Researc	h using biological hazardous agents for humans, animals, plants and/or the
	environ	ment
$\rightarrow$ Des	cription	of the training activity (max. 500 words)
	-	
	-	of the training activity (max. 500 words) for the teaching-learning approach (maximum 500 words)
→Justi	fication	for the teaching-learning approach (maximum 500 words)
→Justi	fication	
→Justi	fication ected in	for the teaching-learning approach (maximum 500 words) npact from a sustainability education perspective (maximum 500 words).
→Justi	fication ected in Which	for the teaching-learning approach (maximum 500 words) npact from a sustainability education perspective (maximum 500 words). key SDGs does the project contribute to?
→Justi	fication ected in Which What a	for the teaching-learning approach (maximum 500 words) apact from a sustainability education perspective (maximum 500 words). key SDGs does the project contribute to? are the expected results/outcomes directly derived from the project activities
→Justi	fication ected in Which What a that co	for the teaching-learning approach (maximum 500 words) npact from a sustainability education perspective (maximum 500 words). key SDGs does the project contribute to?
→Justi	fication ected in Which What a that co To wha	for the teaching-learning approach (maximum 500 words) apact from a sustainability education perspective (maximum 500 words). key SDGs does the project contribute to? are the expected results/outcomes directly derived from the project activities ontribute to the specified SDGs? at extent does the project introduce a transformative learning approach?
→Justi	fication ected in Which What a that co To wha To wha	for the teaching-learning approach (maximum 500 words) apact from a sustainability education perspective (maximum 500 words). key SDGs does the project contribute to? are the expected results/outcomes directly derived from the project activities ontribute to the specified SDGs? at extent does the project introduce a transformative learning approach?
